

Jeffrey Kessler, MD

Current Practice/Center/Institution:

Kaiser Sunset Hospital, Los Angeles, California

Medical School & Graduation Year:

Case Western Reserve University Med School, graduated 1994

Place of Orthopaedic Residency and Fellowship Training:

Residency, Stanford University Department of Orthopedics, 1994-1999

Fellowship, Children's Hospital of Utah, 1999-2000

What attracted your interest to IPSPG?

I was attracted to the idea of trying to find improved solutions to a vexing disease, via international, multicenter prospective studies.

What would you say is the most challenging part of treating Perthes Disease?

I think the most difficult part is trying to give the parents and family definitive answers on which treatment will best benefit their child.

What would you like to see accomplished through annual IPSPG meetings?

I would really like to see an improved understanding of Perthes disease itself, the demographics and epidemiology of the disease-and even more importantly hopefully improved outcomes in the treatment of Perthes.

Of note, I have recently published in-depth studies of the demographics and epidemiology of Perthes disease in Southern California.
